NABEREZHNYKH MARK

REACT DEVELOPER

About me

Started programming with JavaScript in 2019. I specialize in front-end development, I am also familiar with the back-end. Since January 2021, working in office where i have been porting existing projects to React, as well as writing new ones. I work in a team of five people, where there are three front-end developers, including me and two back-end engineers. I have my own project, more about it later. I read the documentation in English, perceive by ear, in the near future I will start talking, I'm working on it.

Skills

- read the code
- full application development cycle

Tech stack

- HTML5, CSS3, JavaScript ES6+
- React, NodeJS, MongoDB
- Redux, redux-thunk, redux-toolkit, axios, express, mongoose
- git, GitHub, linux, trello

Project

My project Hurry Network solves the problem of ordering in restaurants and cafes by phone, during a congestion or if a person needs to order in advance for some reason. This is a platform that allows self-registration for both business and customers. Allows businesses to fill in on their own the menu that will be displayed to customers.

Education

VSUET 2015-2020

Economic Security Specialist
